3D TOOLS

Modelling & Sculpting: Blender, Nomad Sculpt

Game & XR: Unity

2D & Digital Art: Procreate, Krita, Inkscape, GIMP

AI-Assisted: Claude, Blender MCP, Hunyuan

TRAINING & CERTIFICATES

Certificate in Artificial Intelligence, University of Toronto (2025)

Interaction Design & Prototyping for XR, University of Toronto (2023)

Blender modelling, texturing & interior design courses, SkillShare (2026)

EDUCATION

MSc Computer Science, University of São Paulo

BSc Applied Mathematics, University of São Paulo

BA Business Administration, Fundação Getúlio Vargas

LANGUAGES

English (Fluent)
Portuguese (Native)

TECHNICAL RIGOUR | SYSTEMS-LEVEL THINKING

Technical 3D artist and CG generalist with a 20-year foundation in software development and data science, now focused on the full 3D pipeline from clean topology and geometry through texturing and optimized output. Pairs the technical rigour of a computer science background with close attention to detail, delivering assets that meet stakeholder requirements efficiently and to a high standard. Works fluently across Blender, Nomad Sculpt, and Unity, with published personal work spanning modelling, texturing, and real-time deployment, and a track record of switching careers and ramping quickly on new tools and technical problems.

SELECTED 3D WORK

3D Environments & Character Avatars Personal & Freelance, Toronto, ON

2023 - Present

- Designed and published interactive 3D environments and character avatars for VRChat, owning the full pipeline from modelling and texturing in Blender to interaction building and deployment in Unity.
- Applied clean topology and deliberate geometry decisions to keep assets performant, optimizing output for smooth real-time playback on a live social platform.
- Built and maintain a public portfolio at baniverso.com showcasing finished 3D work across environments, characters, and props.

PROFESSIONAL BACKGROUND

Data Science Manager / Staff Product Data Scientist Mozilla, Remote

2022 - 2026

- Led analytics for Firefox browser teams, partnering across Product, Engineering, and UX to turn behavioural data into product decisions affecting millions of users.
- Built a North Star metric framework and machine-learning models, including a 7-day predictor of user lifetime value and geo-based experiments, demonstrating end-to-end technical problem-solving from data to deployed tooling.

Staff Data Scientist / Data Science Lead Shopify, Toronto, ON

2012 - 2021

- Built foundational analytics infrastructure supporting growth from 20K to 800K+ merchants, defining data standards adopted across multiple teams.
- Owned technical architecture for enterprise-scale data warehousing and full data pipelines, progressing from hands-on lead to organization-wide technical leadership.

Software Development & Analytics Roles

2000 - 2012

Dafiti, Buscapé, UOL, DevWorks, Accenture, São Paulo, Brazil

- Progressed through Java development, billing and e-commerce platforms, mobile game development, and marketing analytics.
- Designed end-to-end measurement frameworks for a hypergrowth e-commerce platforms from website instrumentation to multi-channel campaign attribution.
- Performed consulting projects for a range of clients using a variety of technologies.
